

Copyright and Trademark Policy

Effective from May 1, 2022

Copyrights

The Digital Millennium Copyright Act (DMCA) provides a notice and takedown framework for potential copyright infringements. This framework allows copyright owners to bring a notification of claimed infringement for any potentially infringing works that may be hosted or located on Campground. Campground acts expeditiously to remove such works.

If a Campground creator has potentially misused your copyrighted work, please submit a notification of claimed infringement to legal@campground.co. Be sure to conform to the applicable notification provisions of section 512 of the Copyright Act. If you have received a notification of claimed infringement, you have the option of removing the work or bringing a counter-notification to us at legal@campground.co. Be sure to conform to the applicable counter notification provisions of section 512(g)(3) of the Copyright Act.

Trademarks

A trademark is a brand name, slogan, or logo that serves to identify a person or company's goods or services. If you are concerned that someone may be using your trademark in a way that is likely to confuse or mislead the public, please contact us at legal@campground.co. We will review your claim and take whatever action we deem appropriate, including but not limited to removal of the violative mark from Campground.
